

XM provides clear uninterrupted information and broadcasts for my employees and me when we travel the US Highways servicing our Governmental accounts who in most cases are located in remote areas where such broadcasts are not receivable from AM and FM Stations. The quality of XM is far superior to that of most local AM & FM stations in rural areas. The Nation will be better served and should not limit XM from providing all forms of broadcasts. Competition is good and so is alternate choices for full service. In our case thier srvice can not be replaced by regular broadcasts by AM & FM Stations. We service The USACE, NP, USFS and other Governmental and State Parks Facilities throughout the USA. Company name is MITI Manufacturing Co., Inc., 2996 Teller Court, Grand Junction, CO 81504. Phone: (970) 243-9500. www.mitico.com. Please feel free to contact me at any time to discuss this issue and why we feel XM should not be restricted from providing full service to us and others. Thanks and have a great day.

Robert A. Fulcher
Exec Vice President
